Exams:	4 partial and 1 final
Conduct/Dress Code:
Student's Evaluation:	

Six written tests in the multiple choice formats are obligatory for each student during the course. Two of them are scheduled for 2-nd year (credit course, Pharmacology I) and four exams are scheduled for 3-rd year (Pharmacology II). Each of these exams covers actually lectured material. **To be released from writing the final examination (as an award)**, minimum requirement will be to accumulate at the end of the pharmacology course **at least 60% of the maximum score from six exams (60 questions) – minimum 216 points out of 360.**

For those who will not meet this requirements, **a final exam** in the multiple choice format (**90 questions**, A-D, only one is correct, to pass 60% of question must be answered), covering whole material, will be performed at the end of the course. During the course for justifiable reasons student can ask to postpone the date of maximum one exam. Dead-line for passing such missed exam is the end of semester.

Attendance on all seminars is OBLIGATORY. There will be an **attendance list** on the desk of lecturer. **Punctuality is required!** The late more than 5 minutes will be noted on the attendance list.

Students who will not be present on seminars (e.g., during 10 seminars before test, more than 2 absences) **will be not allowed to write test.** To do so, *they will have to pass oral partial exam provided by Coordinator* – before the test.

Going to seminars, student should be prepared about the subject (from books) and be ready to answer questions!

Required book: Bertram G. Katzung. *Basic and Clinical Pharmacology*. 14th Edition, 2017 (the most important)

Leader of the group can contact with Coordinator before September 3rd – by e-mail: mmjawien@cyf-kr.edu.pl (to receive list of “obligatory” drugs for tests).
